The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-21 are rejected under 35 U.S.C. 102(b) as being anticipated by EP '359.

EP '359 discloses wax-coated silica for use in paint formulations. This silica is taught as produced in a process whereby the wax and silica are combined in a fluid energy mill at a temperature above the melting point of the wax, 180 C, for example. Among the waxes taught as suitable is polyethylene wax and wax proportions of 5 to 20% are taught. Suitable silicas are taught as precipitated silica which has been dried and otherwise examined or characterized which is seen as meeting applicants limitation to "classifying". The coated particles are further characterized.

These coated silicas are explicitly taught as suitable for alkyd paint formulations which formulations are seen as meeting applicants limitation to stoving paint.
